Hi Graham,

I wanted you to know that I did not get the plan until August 3. My name was on the address but with Leigh Lehman's address.

I have quickly read the plan and nothing glaring stands out to be corrected.

Under Plan Objectives I would like to see a stronger statement about sustainable agriculture. I believe the whole group seemed to be anti supporters of industrial farming. Organic, animal friendly (humane conditions), healthy, sustainable. What's healthy for animals and plants is healthy for us.

Under riparian habitats- In McConnell creek we have tailed frogs, red legged frogs (diminishing in number – 13 years ago I counted 50 in our pond), and Oregon snail,

Upland Habitats- we have cougar and lynx (we saw one last December)

Thanks for all your good work Graham,

Sharie
